Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn a shifting circuit, classified in class 708, subclass 209.
- II. Claims 9-23, drawn to a floating point calculating circuit, classified in class 708, subclass 495.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (II) does not require the particular shift and shift-out detecting circuit of the subcombination (I) as claimed for patentability because claims to both the combination and subcombination are presented and assumed to be patentable. The omission of specific structures of the subcombination in the combination as recited in independent claim 9, is an evidence that the combination (II) does not rely on the details of the specific subcombination (I), for patentability. In addition, the subcombination (I) has separate utility for shifting data. Therefore, the inventions I and II are distinct, and the restriction for examination purposes as indicated is thus proper.
